

Behavior Analyst Internship at Pediatric Partners

We offer individuals working toward becoming a Board Certified Behavior Analyst (BCBA), or Board Certified Assistant Behavior Analyst (BCaBA), the opportunity to gain experience hours through supervised independent fieldwork. Interns should expect to be immersed in the field of applied behavior analysis by our team of BCBA's. Daily immersive activities include weekly individual supervision with our Pediatric Partner BCBA's, group supervision led by Dr. Jordan Lill, PhD, LBA, BCBA-D, direct patient care, direct assessment, parent training, and learning supervision skills. Behavior Analysis Interns also may lead student projects, participate in skill assessments, functional behavior assessments, and parent training.

Behavior Analysis internships are supervised by Dr. Jordan Lill, PhD, LBA, BCBA-D. Interns will also receive direct supervision by the BCBA's of Pediatric Partners. All supervisors have completed the Supervisor Training series required by the Behavior Analysis Certification Board (BACB). Pediatric Partners utilizes a two-tier approach to providing supervision for Behavior Analysis Interns. First, Interns will receive routine in-session, direct supervision. The goal of in-session supervision is to increase fluency and mastery of the implementation of ABA treatment techniques. Interns will receive weekly one-hour independent supervision provided by Dr. Lill. The goal of independent supervision is to provide Interns with the conceptual knowledge of strategies utilized within the session, as well as discuss current research and relevant items on the [BACB Task List 5](#).

Following an immersive internship with Pediatric Partners, Interns would have the fieldwork experience hours to apply and sit for the Board exam. Upon completion and a passing score on the exam, Interns would be eligible for licensure in the State of North Dakota as well as Board Certification by the BACB. Licensure, Board Certification, and successfully completing the internship could lead to employment as a BCBA with Pediatric Partners.

Experience opportunities:

- Weekly supervision opportunities, with at least six direct contacts
 - Possible to provide **Concentrated Supervision Hours required by BACB**
- Both restricted and unrestricted fieldwork experience available
- Monthly journal club
- Conducting skill-based assessments
- Designing and conducting functional behavior assessments
- Designing, applying, and teaching behavior intervention plans
- Implementing skill Acquisition, behavior-reduction programs, and generalization
- Behavioral Momentum Theory
- Parent Training
- Using and Applying Single-Subject Designs

Why choose an internship at Pediatric Partners?

Pediatric Partners will provide you with a unique opportunity to collaborate directly with other discipline experts within the company including occupational therapy, physical therapy, speech-language pathology, mental health counseling, and early intervention. Pediatric partners also will provide BA interns with opportunities to work with children and families in their home, at the Pediatric Partners clinic, at school, and within the community. Having opportunities to work with multiple disciplines and in multiple sites will provide the BA intern with a well-rounded set of clinical skills to prepare them for a career in applied behavior analysis.

Contact Dr. Jordan Lill, PhD, LBA, BCBA-D for more information.
